

Introduction to FEniCS

17-21 July

9:00-12:00

Sokolovská 49/83

classroom K11

- * Are you studying or interested in mathematical modelling?
- * Do you need **Finite Element Method** in your thesis or project?

This tutorial is ideal for you! During one week, you will learn:

- * how to solve **PDE's** using **numerical software FEniCS**
- * basics, advanced tricks and best programming practises
- * **visualization** of results

This time, the tutorial will focus on **fluids** --- from Navier-Stokes to multiphase and non-Newtonian. It is for free (!) but we have limited capacity. Registration deadline is July 10.
