Knowledge is nothing if not shared

HOW TO GIT GUD
a Git tutorial for beginners

November 24 2023, 15:40 - 18:40
Karlín (Sokolovská 49/83)
room K11

DON'T DO THIS ↓

THIS IS GIT. IT TRACKS COLLABORATIVE WORK ON PROJECTS THROUGH A BEAUTIFUL DISTRIBUTED GRAPH THEORY TREE MODEL.

COOL. HOW DO WE USE IT?

NO IDEA. JUST MEMORIZE THESE SHELL COMMANDS AND TYPE THEM TO SYNC UP. IF YOU GET ERRORS, SAVE YOUR WORK ELSEWHERE, DELETE THE PROJECT, AND DOWNLOAD A FRESH COPY.

source: xkcd.com

Are you lost when it comes to **version control**? Not sure what is the difference between **rebase** and **merge**? Do you solve **branch collisions** by throwing your PC out of the window?

Then our tutorial is ideal for you! We focus on **practical learning** through **interactive exercises**. Learn from a seasoned Git user **Vojta Srdečný**.

You will need:
* English language
* own laptop (PCs available at K11 if needed — not throwable, though).
* account on gitlab.com

Make sure to reserve a seat on our website!
Registration deadline: November 23, 23:59
